■ Ota City Benefit Supplementing the Flat-Amount Tax Reduction (Adjustment Benefit)

Japan's flat-amount tax reduction program was launched in June. If you expect your tax payment to fall short of the threshold amount for receiving the reduction, Ota City offers a benefit covering the difference. Please note that you must apply to receive this benefit.

Eligibility: Persons whose income tax or individual inhabitant tax per income levy is expected to be less than the threshold amount for receiving the flat-amount tax reduction.

Benefit amount: Ota City will calculate the amount that falls short of the flat-amount tax reduction threshold for both income tax and individual inhabitant tax per income levy, add the two amounts together, and then round the result up to the nearest 10,000 yen.

* Visit the Ota City website for more information.

 Ota City will send you an "Eligibility Letter" if you are eligible for the benefit. Please return it to the city along with the necessary supporting documents.

■ Please Observe the "Five Rules for Safe Bicycle Riding"

- 1 As a general rule, ride on the road, keeping to the left. Ride on sidewalks only in special cases. Pedestrians have priority on sidewalks.
- 2 At intersections, observe traffic signals and stop signs. Make sure the way is safe before proceeding.
- 3 Use lights at night.
- 4 Never ride while intoxicated.
- 5 Wear a helmet

■ About Unattended Bicycles and Their Impoundment

Use a bicycle parking lot even when parking your bicycle for a short period of time.

Ota City asks you to obey city ordinances by not leaving your bicycle unattended in public places (i.e., roads, parks, in front of train stations, or any other place that is not a designated bicycle parking area).

Ota City designates certain areas in front of train stations as "no bicycle parking" zones per city ordinance. The city regularly impounds bicycles that are left there. Impounded bicycles are held at one of the city's Impounded Bicycle Storage Centers for 30 days. Please note that bicycles will be disposed of when this period expires.

Help us create a safe community free of illegally parked bicycles by following cycling rules and etiquette.

Prevent Tuberculosis by Getting a Chest X-ray During Your Physical Examination

Tuberculosis (TB) is a disease that occurs when the tubercle bacillus enters the body.

In recent years, cases of TB have been increasing among young foreign-born residents.

Foreign-born patients account for 75% of new cases in the 20-29 age group. Receiving a regular chest X-ray examination is important for detecting TB in its early stages.

If you have symptoms such as cough, phlegm, or fever that persist for more than two weeks, please seek medical attention.

Please visit the Ota City website for more information.
